

Firefly Youth

Who are Firefly Youth?

We are young people from 18 to 29 years old (from 16 by exception). We went through medical treatment of a malignant disease during our childhood. We responded to a call to contribute with our experience to those who are in process of medical treatment and/or theme: life after treatment, difficulties and possibilities.

The goal of Firefly Youth?

Make it easy on children and young confronted with a malignant disease during the period of treatment and after it. It is done by continued education of surroundings about malignant diseases. It is also done by activities that are carried out by young people who were treated for a malignant disease during their childhood. They are connected nationally, regionally and internationally.

The motto of Firefly Youth:

Ease, awake and connect!
